SUBJECT: Facilities Inspection Report - Solar Power Supply Servo Equipment

On 15 January 1963, Mr. [REDACTED]  
[REDACTED] visited [REDACTED]  
to discuss the company's capability in designing a servo control for a solar power supply.

25X1A5a1

Mr. [REDACTED] has designed a small servo control with a few cells which he demonstrated for us. This particular unit is too small for use with a large frame of solar cells. Mr. [REDACTED] however, is interested in proposing for the design of larger equipment. He recalled that we had asked for a similar proposal sometime in 1962.

25X1A9a

Some of the company's other capabilities are indicated in the attached sheets.
